Add Power to Your Work

## NEW FOR 2016!

The side window can now be opened to improve ventilation and the door can be secured in the open position. The comfort cab is tested and approved for ROPS and FOPS.

Efficient air conditioning can be added as an option on the a7236, a7545 and a7545 4T. The air conditioning is located in a protected position and does not increase the machine's overall height.

The adjustable steering and ergonomically positioned controls provide relaxed driving. The comfort cab increases the machine's overall weight by about 200 kg.

### Comfort Cab for the A series

In autumn 2016, a new Comfort Cab is being launched for Norcar's A series. The cab has been designed to provide good all-around visibility and a comfortable working environment. The Comfort Cab's standard equipment includes LED work lights, stereo and an efficient heating system with fresh air filter.
